SUMMARY

Full Stack Developer (MERN Stack) with 3.5+ years of experience building scalable enterprise SaaS+PaaS applications and production-grade full-stack projects. Proficient in Angular and React.js on the frontend, and Node.js, Express.js, and MongoDB on the backend. Strong track record in reusable UI component libraries, REST API design and integration, and performance optimization, with a focus on delivering end-to-end results.

TECHNICAL SKILLS

Frontend	: Angular, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, RxJS, Tailwind CSS
Backend	: Node.js, Express.js, REST API Design & Integration, OAuth 2.0, Authentication
Databases & AI	: MongoDB (Native Driver), Gemini AI, Import/Export, Multi-Language Support
UI Libraries	: Syncfusion, Form.io, Liquid.js, Monaco Editor
Platform & Arch.	: MERN Stack, SaaS+PaaS Design, Low-Code/No-Code, Core Component Development
DevOps & Workflow	: CI/CD Pipelines, Git/GitHub, Vite, Agile/Scrum, Code Review, Production Deployments

EXPERIENCE

Associate Software Developer

Sep 2022 – June 2026

TechExtensor

Ahmedabad, India

- Led front-end development for **TechAppForce** — an enterprise SaaS+PaaS low-code platform enabling **5x faster application development**, now live with **3 active tenants**.
- Designed and implemented **10+ configurable, reusable UI components** using Syncfusion (Grid, File Manager, PDF Viewer, Scheduler, Chart, Iframe, etc.), shared across all tenant applications.
- Boosted platform performance by **70%** through bundle optimization and lazy loading strategies.
- Delivered core platform features: Import/Export, Release Management, Notification Management System, and Multi-Tenancy support; integrated and consumed **Node.js**-backed REST APIs throughout.
- Served as **primary code reviewer**, mentoring team members and managing all production deployments.
- Adopted Liquid.js to build dynamic, data-driven dashboards; executed parallel delivery of two production applications meeting all release timelines.

KEY PROJECTS

Database Explorer — MongoDB Studio & AI Assistant | React, Node.js, Express, MongoDB, Gemini AI | github link

- Built a full-stack MongoDB Studio with a React 18 + TypeScript frontend and a Node.js/Express backend featuring dynamic multi-connection management, schema auto-discovery, and multi-view document explorer (Table, Tree, Monaco Editor) with AI Integration to translate NP to Queries.

Spotify Clone | React, TypeScript, Redux Toolkit, Node.js, Express, OAuth 2.0 | github.com/Radhikapujara17/Spotify_clone

- Built a full-stack Spotify clone — React 19 frontend with a Node.js/Express backend acting as a secure OAuth 2.0 proxy; implemented Spotify Web Playback SDK, Redux Toolkit for persistent player state, debounced search, and infinite scroll.

TechAppForce — Low Code Platform | Angular, TypeScript, Syncfusion, REST API | techappforce.com

- Built core platform modules: import/export, multi-tenant setup, environment bootstrapping, custom UI components, and release management pipeline.

Project Management System | React, TypeScript, Form.io, REST API | zynwork.com

- Developed Work-Item, Sprint, Timesheet dashboards, and User Daily Metrics with multi-screen UI flows and reusable React components.

Phoenix — Insurance Application | Angular, TypeScript, REST API

- Delivered user onboarding, claim creation, and role-based workflows for doctors, radiologists, and insured users with integrated payment processing.

KEY ACHIEVEMENTS

Performance: Boosted platform speed by **70%** via bundle optimization and lazy loading; enabled **5x faster** app development on the low-code platform.

Scale & Delivery: 10+ reusable Syncfusion components across all tenants; parallel delivery of two production apps; full-stack Node.js projects from OAuth proxy design to AI-integrated MongoDB tooling.

Quality & Leadership: Primary code reviewer; managed production deployments; independently adopted Liquid.js and Gemini AI to unblock and elevate delivery.

EDUCATION

Sal College of Engineering

Bachelor of Engineering in Computer Engineering

2022

CGPA: 8.0/10
